+91-9970644325 | kadamprashik23@gmail.com | github.com/Prashikdev2315 | linkedin.com/in/prashik-kadam

Summary

Final-year CS undergraduate with **2 patents** (published + filed) in robotics and agri-tech. Deployed ML systems across **healthcare, agriculture, and drug-discovery** — from sensor data to live inference apps. Shipped features to an ed-tech platform with **1,000+ students**. **GATE CSE 2025 qualified**.

Education

PDPM IIITDM, Jabalpur

2023-2027

B.Tech Computer Science and Engineering

Experience

Indian Institute of Technology Ropar

May 2026 – July 2026

Software Engineering Intern, Vicharanashala Lab for Education Design (VLED Lab)

GitHub

- Shipped 4 features to **Spurti**, an open-source ed-tech platform serving 1,000+ students, using the MERN Stack
- Prototyped 2 app integrations via PRs, adopted into the live production codebase after mentor review

PDPM IIITDM Jabalpur

Jan 2026 – April 2026

Web Developer, Fusion ERP (Institute Portal)

- Architected the **Healthcare Management Module** for IIITDM Jabalpur's ERP portal, including full-stack workflows, technical documentation & API specs for institute-wide rollout

Skills

Programming & Querying: SQL, MongoDB, C++, Java, JavaScript, Python

Machine Learning & Data Analysis: Scikit-learn, Tensorflow, Pandas, NumPy, PyTorch, Flask, OpenCV

Developer Tools: Git, GitHub, VS Code

Concepts & Domains: Explainable AI, Predictive Modeling, Multi-label Classification, Model Deployment

Projects

KrishiLink – Semi-Automatic Paddy Transplanter and Soil Analyzer | *Flutter, ESP32, Python*

GitHub

- Engineered a semi-automatic paddy transplanter with four-bar linkage kinematics
- Integrated RS485-based NPK, pH, EC, and ORP sensors via **ESP32** and Firebase RTDB
- Developed a Random Forest predictive model for fertilizer, irrigation, and salinity management recommendations
- Developed a Flutter mobile app with Provider architecture, **9-language support**, real-time alerts, and contextual AI chat

BharatDrishti — Satellite Geospatial Change Detection | *Python, PyTorch, FastAPI, React*

GitHub

- Built an end-to-end change detection pipeline on Sentinel-2 imagery using **ChangeFormerV6** (Siamese Transformer, 41M params), served via a **FastAPI** backend
- Engineered NDVI-based classification with spectral-diff fallback, flagging **300+ km²** of change across **3 Indian regions**
- Developed a **React/Leaflet** frontend with before/after compare slider and auto-generated AI analysis summaries

Drug Side Effect Prediction Using AI | *Python, PyTorch, ECFP/SMILES*

GitHub

- Analyzed **1,100+ drugs** across STITCH, SIDER & DrugBank; generated ECFP fingerprints from SMILES for molecular feature modeling
- Trained a **PyTorch MLP** for multi-label classification across **20+** side-effect categories, achieving **$F_1 > 0.90$** for major adverse-event classes; deployed via an interactive Flask interface

Intellectual Property

- Patent Published: **IN202621081530 A1** — Vision-Guided Robotic Welding System, PDPM IIITDM Jabalpur, Aug 2026
- Patent Filed: **Semi-Automatic Paddy Transplanter**, IIITDM Jabalpur (Under Processing)

Achievements & Certifications

- **GATE 2025 Qualified (Computer Science Engineering)**
- **Smart India Hackathon (SIH) 2025** – Selected among the **top 38** teams out of **193** at college level
- NPTEL-SWAYAM (12-week) **Silver Medal**: Business Intelligence & Analytics, Ethical Hacking
